HEATING HOMES FOR GENERATIONS

FLARE

Welcome

Welcome to this very special selection of beautiful fires and fireplaces.

Mankind's fascination with fire has always generated a desire to create a central area of warmth and security in the home, but today our theme is very much about modern living.

The ambience a new fireplace can bring to a home can be a life changing experience for the family. A wonderful FLARE fireplace will give you years of pleasure; a place to entertain friends, to reflect or just to relax.

Browse through this collection and you will journey through time with our designs; from the traditional, period styles to the cutting edge contemporary creations, this collection includes it all.

We guarantee you'll find your perfect fireplace. So relax, unwind and imagine your makeover crowned with a beautiful FLARE fire or fireplace.

Our surrounds are designed to keep up with changing lifestyles and include features which only we can produce thanks to our investment in the latest machinery.

At the same time, we depend on our craft skills to hand finish and polish each marble or timber piece to perfection.

It is this balance of innovation and heritage that makes your FLARE fireplace uniquely special.

As part of the BeModern® Group we manufacture a range of product in house, to include, surrounds, fires and fireplaces in marble and timber, as well as steel and cast stoves. Our bathroom range suits both the traditional and contemporary home.

Micro Marble Surrounds

Of all the materials to create a fireplace with, micro marble is surely the most luxurious, providing the most beautiful finished piece.

FLARE micro marble is hand selected and hand finished to perfection. With a consistent pattern micro marble guarantees a smooth and high quality finish. It is made from pieces of real marble finely crushed and bonded together with resin to obtain a consistent surface.

Complete with surround, back panel and hearth, we guarantee you will find the ultimate adornment for a luxury home.

Our luxurious micro marble surrounds are available in Manila or White. Bring every natural detail of the marble to life with optional under mantel lighting. With Motion Sense simply brush your hand across the surround to showcase your fireplace and hearth in a soft, comforting glow.

Micro Marble Inglenooks

The charm of micro marble is captivating in an inglenook design; available in White, each surround can be beautifully paired with four optional back panels. Choose from White Marble, Grey Herringbone, Chicago Concrete Herringbone or Grey Slate effect and create the perfect combination to compliment your interior whether contemporary or traditional.

Motion Sense under mantel lighting can be activated from a subtle hand movement across the surround to adorn the inglenook back panel with a warm glow.

Our micro marble Inglenooks are suitable for electric stoves only; choose from our range of contemporary and traditional electric stoves and add a decorative flue for the look of a real woodburning stove.

Timber Surrounds

Boasting adaptability to suit a traditional or contemporary setting, our Timber Surrounds are designed with beautiful lines, a strong profile and individually selected painted finish for a stunning appearance.

The quality of workmanship is evident in the finish and the detail which ensures the eye is drawn to this centrepiece wherever it sits in the room.

Create a statement piece with our optional back panel and standard lipped hearth sets available in White or Manila micro marble. Add an inset gas or electric fire to finish the whole look.

Micro Marble Gas Fireplaces

Pre-Cast or Standard Flue solutions.

We have engineered a way to fit our highly desirable 900 gas fires into the standard 16 x 22" opening in a UK chimney breast or pre-cast flue, with no building work.

The installation is all the more simple because all the fireplaces are made as a complete single unit. It has taken years of research to develop and perfect this innovative technology which puts us ahead of the market.

Timber Inglenooks

New styles and new finishes combine to create our stunning range of timber inglenook surrounds; the soft hues of the surrounds are complemented by the Concrete and Grey Slate effect back panels.

These beautifully designed flat to wall fit inglenooks, give the added depth of an inset inglenook without the need for any remedial work to the wall they are positioned against.

Under mantel lighting is included and once on will adorn the inglenook back panel with a warm glow.

The range includes not only traditional inglenook surrounds, but also full chimney breast inglenook options.

Inset Electric Fires

Each fire has been designed to provide a glowing natural focus in any room. The heat is instant and thermostatically controlled for lasting comfort.

There's no need for a chimney or flue just plug in and enjoy.

The latest LED technology emulates the shimmering and smouldering effect of a natural flame to a degree that will amaze you. Our flame effect only setting also allows you to enjoy the flame effect all year round.

LED technology benefits:

- ◆ Energy Efficiency*
Running the flame effect only costs less than £8 per year
- ◆ Realistic Flame Pattern
LED technology provides a clean, flicker-free realistic flame effect
- ◆ Long Life*
The expected life of our LED's is in excess of 30 years

* (Assuming 5hrs / 7days per week usage. Based on 34p per kWh, 05/01/23)

Inset Gas Fires

With a FLARE gas fire you are adding a true centrepiece which naturally draws people together, creating a relaxed ambience that enhances the quality of life at home.

Now that you have chosen your perfect surround, it's time to give it a warm glowing heart. Choose from our Design Collection or Classic Collection with a choice of cast fret options. Or simply choose either the Cast Abbey Arch or Avantgarde from our complete range.

Each of our timeless designs offer different variations which you can refine to your tastes, be it contemporary or traditional.

Introduction.....	28-29
Design Collection.....	30
Cast Stove Front.....	31
Elsie 900.....	31

Check the chimney or flue

All gas fires require a chimney or flue to conduct expended gases outside. FLARE has a range of fires available to suit your chimney or flue type. To help you identify which type you have and which fire will fit it best (slimline, mid-depth or deepline) look at the simple explanation below. If you are still in any doubt about which flue or chimney you have, please contact one of our approved retailers for advice.

All gas fires are supplied with a 5 year warranty†
Terms & Conditions apply

All gas fires are rigorously tested and checked by our internal Quality Control Department to the latest ISO standards before being sent to our approved retailers.

All gas fires are supplied with a 5 year warranty providing you with the reassurance and peace of mind that you have purchased and installed a high quality product.

†Abbey & Avantgarde hold a 12 month warranty

Brick Chimney | (Class 1)

A conventional chimney for use with a solid fuel or gas appliance is easily recognisable, as the stack rises above the roofline and usually has a pot or gas terminal on top. With this type of chimney you can install all our gas fires including the deepline model.

Pre-Fabricated Flue | (Class 2)

Identifiable by a metal flue and terminal on the roof this flue system is suitable for all Be Modern gas fires.

Pre-Cast Flue

A pre-cast flue can be identified by a ridge vent on the roofline. Built from concrete or clay blocks usually within the wall cavity, they are perfect for our Radiant Slimline or Radiant Deepline* gas fires.

**Radiant Deepline suitable when installed with a 75mm rebated fire surround*

Ease of Operation

All gas fires are available with a Smartslide Control feature to turn the fire on and regulate its flame level. Mounted on the side of the fire, the control provides convenience of operation.

If you prefer the traditional feel of a gas fire choose one of our open fronted models with manual controls. Concealed behind the fret of the fire, the controls are easy to access so you can regulate your desired flame setting and heat output.

A safe fire in your home

Quality Approved

For your reassurance, all FLARE fires are made in accordance with Quality Management System Standard ISO 9001. We have a range of fires available to suit your chimney or flue.

Flame Failure Device

All gas fires are fitted with a device which ensures that in the event of the flame going out during operation, the gas supply to the fire is cut off.

Oxygen Depletion Sensor

All fires are fitted with an Oxygen Depletion Sensor that shuts off the gas supply if the oxygen level is too low in the room or if there is a blockage in the chimney or flue.

Fire Additions

Matching Handle

The Smartslide Control handle is available in Black, Brass or Chrome finish.

Black handle supplied as standard

Easy Grip Handle

An easy grip handle is available for all fires. It is a simple attachment to the handle allowing convenient control of fire ignition and heat settings.

Xtra Canopy

Extra efficiency comes in the form of a canopy kit designed to raise the efficiency of the fire by up to 8%.

Optional Spacer

Fits to the rear of the fire and reduces the depth by 25mm. It is ideal for use with pre-cast flues where there is insufficient space.

Brushed Steel

Black

Brass

Chrome

Design Collection

The framework of the Design Collection is broad and slightly accented to compliment the curving bands of the fret.

The harmony of the trim and fret provides a very contemporary design yet remains sympathetic to cutting edge interior.

Simply choose your fire and then select from our stunning fascia options to create that aspirational look, in keeping with any interior.

Electric Stoves

The stove in its most convenient form; drawing on innovative design and the authenticity of the visual effect, the flames and smoulder emulate that of a real woodburning stove to the finest detail.

Our electric stoves will provide instant heat into the room, thermostatically remote controlled with a 7 day programme for lasting comfort, or manual options.

Gas Stoves

The flame picture which arises from the hand crafted ceramic fibre logs or coals in our Gas stoves is remarkably reminiscent of the real thing, whilst the heat is comparable in quality to the warmth radiating from our equivalent multifuel stoves.

The ease of control whether manual or remote, allows you to optimise the heat output, from blazing to smouldering. The sturdy construction of cast or steel and the optional fuel bed and door inserts on certain stoves, ensure that the finished look will suit your home, be it traditional or contemporary in style.

Multifuel Stoves

Our multifuel stoves hold energy efficiency class (EEC) ratings of A, making them the top of their class when it comes to reducing your carbon footprint.

Ecodesign Ready 2022 stoves are designed to burn at higher levels in the fire box; this greatly reduces the organic particles that are normally released, which in turn significantly reduces the level of emissions and has a positive impact on carbon reduction.

The Actiview™ system enables all our stoves to keep it's glass clean for longer.

 † 12 Month warranty on Elsie 900 and Avantgarde models

Specification correct at time of print

All gas fires are supplied with a 5 year warranty†
 Terms & Conditions apply

For over 59 years Be Modern has been manufacturing fires and fireplaces to the highest of standards.

All gas fires are rigorously tested and checked by our internal Quality Control Department to the latest ISO standards before being sent to our approved retailers.

All gas fires are supplied with a 5 year† warranty providing you with the reassurance and peace of mind that you have purchased and installed a high quality product.

All fires are fitted with an Oxygen Depletion Sensor that shuts off the gas supply if the oxygen level is too low in the room or if there is a blockage in the chimney or flue.

Only use a Gas Safe Engineer to fit or service your gas fire.

Caring for your fire

Our range of gas fires have been designed to provide you with a clean and efficient heat source as well as years of hassle-free operation. To ensure your fire provides you with maximum enjoyment we have provided the following guidelines for caring for your fire.

1. Only use a Gas Safe Engineer to fit or service your gas fire.
2. Never attempt to remove or service the gas fire yourself.
3. Your gas fire should be regularly serviced and safety checked every year.
4. If you think there might be a gas leak or notice any signs of carbon monoxide, act quickly and follow the advice for gas emergencies.
5. If you are in any doubt regarding your gas fire, speak to a Gas Safe Engineer or contact your local fireplace retailer for assistance.

Under mantel LED lighting

Motion Sense Lights

Under mantel LED lighting highlights every natural detail of micro marble, giving your whole room a soft illuminated background. The lighting is concealed in the top recess of your surround creating an aesthetically pleasing yet energy efficient feature as an option on all models across the Marble range.

BeModern[®] | 19/34 Bedesway | Bede Industrial Estate | Jarrow | Tyne and Wear | NE32 3BE

BeModern[®] hold design copyright and registration of design for its product ranges. BeModern[®] are continually striving to improve and develop their range of products. It is important, therefore, to check details before ordering as sizes and specifications may change without prior notice. Whilst every effort is made to ensure accuracy and colour, it is not always possible to obtain perfect reproduction because of the materials and printing processes used and you may find that shades, natural grain markings and marble colouring are not consistent. © BeModern[®] June 2024
